Seasoned Full Stack Developer, Digital Systems Executive, and AI-Augmented Architect with 22+ years of experience architecting eCommerce platforms, modernizing cloud infrastructure, and leading cross-functional teams. Proven ability to scale systems, reduce costs, and align digital strategy with business growth through leveraging LLMs (Cursor AI, Claude, ChatGPT/Codex, Gemini, Grok and local models like Qwen3.6) for accelerated development, code review, research, and automation. Deep expertise in Magento 2/Adobe Commerce, AWS, DevOps, and self-hosted AI workflows.

AI & Productivity	-	Magento 2 Expert	-	E-commerce Architect	-	Web Development
Project Management	-	Performance Tuning	-	AWS Cloud Infrastructure	-	Digital Transformation
Documentations	-	Product Management	-	DevOps & Infrastructure	-	Cursor AI / Local LLMs

WORK EXPERIENCE

Solutions Architect (Consultant) – Klizer LLC, Austin, TX / Remote

07/2025 - Present

- Consulting with multiple clients on eCommerce platform performance, stability, and scalability, with a focus on Magento 2 and expanding into other platforms.
- Contributed to major database optimization and archival efforts, reducing primary database size from over 500GB to under 200GB while significantly improving query performance and overall system responsiveness.
- Developed and maintained bash/shell scripts for database cleanup tasks (one-time, manual, and cron-scheduled) and DevOps deployment automation, streamlining processes, reducing manual effort, and improving efficiency in collaboration with the team while leveraging Cursor AI and local LLMs for rapid scripting, testing, and optimization.
- Reviewing and assisting with server migrations from various hosting providers to AWS, optimizing configurations for performance, cost efficiency, and security.
- Providing near-time-zone technical support for US-based clients to complement offshore development teams.
- Review and document server environments, making recommendations for configuration improvements, scalability, and security.
- Auditing and revising custom modules for performance, compatibility, and maintainability.
- Consulting on SEO strategies, digital marketing initiatives, and analytics integration for company and client projects.
- Author and maintain detailed documentation for modules, system processes, vendor integrations, and operational workflows for stakeholders and management.

Solutions Architect & Digital Systems Lead – Sokolin LLC, Yaphank, NY

10/2022 - 06/2025

- Led company-wide digital initiatives, architecting scalable eCommerce and cloud platforms.
- Directed Magento 2 upgrades and full Hyvä theme redesign, boosting performance and customer experience.
- Rebuilt AWS EC2 architecture to improve security, scalability, and speed.
- Oversaw development of a Flutter-based mobile app, reducing costs by 45% through a unified iOS/Android codebase.
- Architected and delivered custom Magento 2 modules for:
 - Advanced order processing and validation workflows.
 - Specialized wine inventory and liquid asset storage management.
 - ERP-integrated order history, inventory, and shipping operations.
 - Operational automation, business workflows, and marketing integrations.
- Developed GraphQL endpoints to support seamless mobile app integration.
- Automated EC2 provisioning, cron tasks, and product image pipelines.
- Authored technical documentation for infrastructure, custom modules, and deployment processes.
- Produced stakeholder-facing process guides and vendor/system integration playbooks.
- Streamlined digital operations, reducing contractor reliance and saving \$30K annually.
- Initiatives contributed to \$1M+ in new yearly sales and 200K+ new customers, despite industry-wide declines.
- Ensured all code and modules remained Hyvä-compatible and performance optimized.

Senior Web Developer - Sokolin LLC, Yaphank, NY

10/2020 - 10/2022

- Built custom Magento 2 modules to support:
 - Checkout experience improvements, including dynamic shipping restrictions and validation logic based on state regulations and cart contents.
 - Product page components to display compliance notices, inventory messaging, and shipping limitations dynamically.
- Customized EC2 Linux servers to improve security and maintain high uptime standards.
- Authored internal documentation for custom modules, daily operations, vendor integrations, and cross-departmental workflows.
- Implemented Jira/Confluence-based Agile workflows to streamline project tracking and reporting.
- Supported product photography, asset editing, and conducted cross-departmental training sessions.

Senior Web Developer - US Water Systems, Inc., Indianapolis, IN

01/2020 - 08/2020

- Led code reviews, Magento 2 module audits, and successful migrations from Magento 1 to Magento 2, including product imports and theme/module upgrades.
- Designed, built, tested, and implemented robust, scalable Magento 2 modules; customized and revised third-party vendor modules to meet business needs.
- Deployed Docker-based local development environments (Nginx, Varnish, PHP-FPM, MariaDB, Elasticsearch, RabbitMQ, Redis, Traefik, Dnsmasq, Portainer) on Windows, Linux, and MacOS using PhpStorm and VS Code.
- Supported frontend and backend development (PHP, HTML5, CSS3, JavaScript, XML); ensured cross-browser and multi-device compatibility.
- Collaborated with external developers on Git-managed code merges, deployments, and versioning; provided technical support to Sales and CSR teams for eCommerce operations.
- Conducted A/B and performance testing to optimize usability and reliability.
- Authored detailed process documentation and internal guides to support the marketing team and cross-department initiatives.
- Played a central role in coordinating design rollouts, feature development, and product launches.

B2B Ecommerce Manager - Fineline Printing Group, Indianapolis, IN

07/2019 - 10/2019

- Oversaw multi-site Magento 2 environment with enhanced custom extensions: maintained and customized themes to support client-specific needs.
- Managed day-to-day storefront operations, onboarding, product setups, and order management; directly supervised two team members.
- Worked closely with Sales, Customer Service, and Technical Solutions teams to align platform improvements with business strategy.
- Coordinated development tasks and roadmaps via Asana and internal systems; performed product photography and editing to maintain brand consistency.
- Authored internal documentation and process guides, contributing to more efficient cross-team collaboration.

General Manager - Ultrasun USA, Inc., Indianapolis, IN

11/2007 - 03/2019

Lead Web Developer (Concurrent Role)

- Directed all business operations, staff hiring/development, budgeting, scheduling, and project management for a nationwide wellness equipment distributor, overseeing complex, multi-year initiatives across eCommerce, product, and operations.
- Managed full product lifecycle for US operations, including a 42,500+ product catalog, inventory management, product photography/asset editing, pricing strategies, and vendor coordination—driving annual online sales growth to over \$2 million.
- Executed comprehensive digital marketing and eCommerce strategies (SEO, Google Ads, social media, analytics) while coordinating cross-functional projects with marketing, product, sales, and international engineering teams.
- Enhanced operational workflows, created 200+ page technical manuals and training materials, led US trade shows, hosted distributor events, and ensured FDA compliance—streamlining processes and supporting business growth.

- Responsible for the Ultrasun global portfolio (Ultrasun, Sunfit, Gardasun, freeSTAYL, CollagenicMachines, Dr. Muller, Transpashutters, and BeautyLight); development, programming, content, maintenance and updates for the portfolio of more than 200 domains and websites.
- Led global web portfolio management (over 200 domains/sites), including architecture, content, maintenance, and standardized branding using WordPress/WooCommerce and Magento.
- Integrated Magento and WordPress to create unified help and knowledge centers, improving support workflows and consolidating resources.
- Developed multi-store, multi-site setups with advanced customer segmentation, pricing strategies, and custom product configurations.
- Coordinated UI/UX design efforts, creating hundreds of mobile-friendly, responsive pages.
- Fostered cross-functional collaboration with marketing, product, and external development teams, driving continuous improvement in customer journey and online performance.
- Traveled extensively throughout the US and internationally (Germany, Netherlands) for equipment servicing, customer relationship building, specialized training, product enhancements, trade shows, and in-person technical/strategic support.

Operations Manager - Ultrasun USA, Inc., Indianapolis, IN

02/2003 - 11/2007

- Created detailed training materials, including a 200+ page technical manual, and supported US trade show and FDA compliance efforts.
- Directed daily operations of 10+ employees, developed training materials, and designed visual content for online knowledge centers and trade shows.
- Led US trade shows and FDA compliance initiatives.

EDUCATION

Associate's degree - Computer Networking Systems Technology

1999 - 2001

ITT Technical Institute - Indianapolis, IN

- Transferred from Electrical Engineering Technology, when CNST became available.

PROFESSIONAL DEVELOPMENT

Magento 2 Developer Training (Ongoing)

11/2022 - present

M.academy University - Remote

- Focused on advanced Magento 2 development, best practices, and performance optimization.

Online Coursework - Udemy.com

03/2015 - present

- Wide range of courses selected and taken over the years.
